### Pixel Pusher Web App

Full Stack

React-Redux | Ruby on Rails | PostgreSQL HTML | SCSS | Git

Pixel Pusher is a photo sharing web application with features: user authentication, image upload, user follow

Used React-Redux and AJAX to architect a single page web application

Designed and implemented using a single page app front-end and restful API backend

Hosted and deployed app to heroku and using cloudinary as a CDN

Built a custom Webpack bundle to transpile the front-end application into one file across multiple browsers, reducing compile deploy time

### Woven iOS App

Front-end

MongoDB | Express | React Native | Node.js | Git | Adobe Photoshop CC 2017

Woven is a iOS application that fosters interpersonal relationship through shared features: to-do list, raise a virtual plant, instant messaging

Collaborated through Git, worked under different branches, conducted code reviews before merging a branch

Used React Native's built in libraries to create interactive hidden messages and animation display based on user interactions

Created a custom animation component to automatically render different frames at variant speed based on time, health level, etc.

## WORK EXPERIENCE

2012  
-2016

### Sunhee Moon Boutique

San Francisco, CA

Web Specialist | General Manager

Executed bi-monthly email campaigns using HTML and managed e-commerce platforms that resulted in a 50% subscriber increase in the span of 1.5 years

Developed pricing and distribution strategies based on monthly store logistics

Tracked inventory and finances for over 30 vendor and 10,000 client accounts using Excel and Quickbooks

Effectively negotiated multiple vendor contracts that lead to increased profit margins

## ACCOMPLISHMENT

SEPT  
2017

### 1st Place Tech Lead

San Francisco, CA

SF FW 2017 Disrupt Hackathon
